

A brick is a brick is a brick
or
step by step we build
a new society together
in a
Inno-Wise way
making
people a part of
their own solution

brick by brick
step by step
we collectively tailor,
not only fruitbags
but also actionplans, tools and
strategies
not only talking
actually making empowerment

brick by brick
step by step
we re-think, we re-make
we re-use, we re-claim
social innovation
it's just another word for
locally produced
joy of life
because re-cycling is really innovative

brick by brick
step by step
at least 8 per mille
transforming
bricks from
vulnerable fragility
to create a strong path to the
future
a new life
a new knowledge

a new life
a new knowledge
a new opportunity
a new solution
a new beginning

brick by brick
step by step
a roadmap for involvement
talking cooperation forward
the key to success
is step by step
build
trust and relations

So a brick is a brick is a brick
and also material
to a sustainable future
a collective future
a future of collaboration

let's write
step by step
the handbook of empowerment
together
because
we have
wonderful stories to tell
stories
that
step by step
brick by brick
build a new society

Written by the participants
of the SEMPRES study visit to Italy.

Florence, April 2018
